

## ***Concentrated Advanced odor counteraction***

- Reliable Odor Control
- Cost Effective
- Environmentally Friendly
- Essential Oil based
- 100% Biodegradable
- Recyclable
- Concentrated
- Easy Dilution

***AirSolution technology has advanced! The AirSolution you have trusted for forty years has now improved...*** Following the success of our new GelTech cartridges comes the same advanced technology in liquid form to create the AirSolution Advanced series of products.

As our global population advances, so must our technology. AirSolution Advanced Formulations are more concentrated, more powerful and more cost effective, while being tailored to uniquely and tastefully complement the environment to which they are being introduced. The Advanced Formulations are “non-polarizing”, resulting in a high acceptance rate by consumers. These formulations mirror our new Geltech Cartridges for uniform and consistent odor control throughout our product line and the desired application.

Organic odors common in high density environments demand effective treatment. New AirSolution Advanced formulations use improved patent-pending odor neutralizing technology to effectively deal with problems encountered in these troublesome areas.

The complex blend of essential oils work through the process of odor counteraction to reduce odor complaints. During this process, AirSolution reacts with the odor molecules to immediately begin breaking them down, converting them into non-volatile compounds to dramatically reduce odor concentration and intensity. This is true neutralization, not a masking agent or perfume.

### Environmentally Sound

AirSolution is 100% biodegradable and the containers are recyclable #2 HDPE. Please flush thoroughly and check your local recycling program.

### Ideal For:

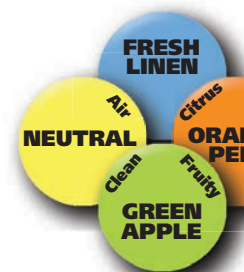

Garbage Chutes	Trash Rooms
Recycling Rooms	Industrial Facilities
Restaurants	Loading Docks
Storage Areas	High traffic areas

### Code

50-AIR-0647  
50-AIR-0200  
50-AIR-1530  
50-AIR-1750  
50-AIR-1780  
50-AIR-1840  
50-AIR-1870

### Description

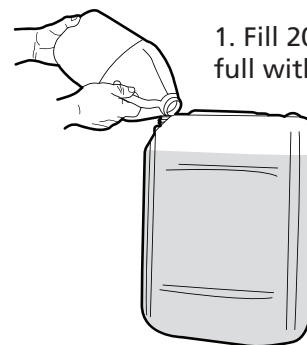

AirSolution #14  
Assorted Concentrates, 4 X 4 L  
AirSolution #57 Green Apple  
AirSolution #71 Orange  
AirSolution #72 Fresh Linen  
AirSolution #74 Neutral  
AirSolution #75 Athletic

### Odors Treated

- Nuisance Organic Odors
- Organic Acid Odors
- Cigarette Smoke
- Body Odor
- Urine and Fecal Odor

### Mixing Instructions

1. Fill 20L (5 gal) pail half full with water.
2. Pour 4L (1.05 gal) concentrate into pail.
3. Top up pail with water and mix.

**Recommended for the AirPro System**
