

XStreme™ Vapor

ADVANCED WATERLESS ODOR CONTROL

www.ecolo.com

Odor Control Made for a Better Future.

COMMERCIAL ODOR CONTROL SIMPLIFIED

XStreme® Vapor Units produce industry-leading vapor output by combining Ecolo's proven AirPro® and XStreme® Vapor Solution technologies. Ecolo's finely machined products have been developed to provide a consistent output of ultrafine particles that average just 1 micron. These smaller, lighter, and more numerous XStreme® Vapor Solution particles have a greater number of interactions with odor molecules, thereby eliminating or dramatically reducing the odor concentration and intensity.

XStreme® Vapor dispensing stations have been developed exclusively for use with Ecolo's AirPro®.

- Operates Multiple Vapor Units
- User-Friendly Analog Timer
 - Wall-Mounted
 - Quiet Operation
- Weather-Resistant Thermoplastic Polycarbonate
 - Operates Automatically & Unattended
 - Independent Zone Operation

Common Applications:

- Trashrooms
- Trash Chutes
- HVAC
- Trash Compactor Room
- Loading Dock
- Roll-Off Compactor
- Waste Water Plant
- Food Processing Plant

XStreme® Vapor Solutions are powerful, waterless neutralizing agents that combine complex proprietary blends with essential oil technology to combat common odors. While designed for specific applications, XStreme® Vapor Solutions are effective on a broad range of malodors.
